

The image shows a room with walls covered in acoustic panels. The panels are arranged in a pattern of overlapping circles, creating a scalloped effect. The colors transition from a warm orange on the left to a deep red on the right, with a pinkish-purple in the middle. A pink armchair with a gold frame is positioned in the lower left. A tall, narrow mirror with a gold frame stands in the lower right, reflecting the chair. The floor is made of light-colored wood in a herringbone pattern. The text is centered in the upper half of the image.

HUSH ACOUSTICS'
LUXE SERIES LOOK BOOK
COLOR SHADES

Luxe Color Palette

Hush Luxe is our pioneering series of 50 meticulously crafted surface shades. They seamlessly join our existing line of 15 original solid core colors, now referred to as Element. But it's something more than just new colors. It's the fusion of our core options with these new colors, resulting in a different texture: the speckled Haze or the subtle and airy Polar. A simple choice between Haze and Polar, coupled with our varied color combinations, can shape entirely unique atmospheres and moods.

Discover the transformative power of the Exposed Core! Present at the edges or within the etchings, it creates eye-catching lines that enhance the geometric design and introduce a bold contrast, thereby enriching and elevating your solutions.
